Dear Dr. Hans,

Greetings and Happy New Year. I hope you are fine and doing well with your family.

How is life treating you so far. Are you still working at Premise Hospital or move somewhere else.

I am really sorry that I have not been in contact with for long time, but to be honest and tell you the truth my and my family remember you by heart and we are always grateful to God that made the opportunity to meet you, know you and do my son throat operation.

My son Ahmad Bilal is doing well now and his throad is all right after you did the operation. He also remember you and always talk about the time you took him from me to the operation room.

We are always praying for your health and happniess and your success in life.

God bless you and your family.....

Take care
Abdul Qader

Dear Qader,

Nice to hear that Ahmed is doing fine. Pl stop all his medicines now. Pl also inform me of anything in future.

Love,
Dr. Hans

Dear Dr. Hans,

Greetings,

I hope you are doing well and everything is safe and sound with the family as well.

My son Ahmad Bilal is ok and doing well. I continued with the medicine that we talked on the phone and has finished .

He can eat normally and has not complained so far.

He gargles the betadine while he goes to bed at night but not during the day. betadine is almost finished, please advice if he needs to continue gargling it.

He doesn't take any medicine now and please advice if he should do so. .

Once again I thank you so much and wholeheartedly appreciate your efforts and kindness.

best regards,

Abdul Qader

Dear Abdul,

I hope everything is fine. You can stop the medicines now but give him syrup combiflam & make him do betadine gargles. If you can see his throat pl see if there is any redness or not, if so we will have to change the antibiotic.

Regards,
Dr. Hans

Dear Dr. Hans,

Greetings from Kabul ,

I hope you and your family is doing well.

I am glad to have the opportunity to thank you once again for the assistance you have provided me and have done a very successful surgery of my son throat through your nice hands.

I am sure that the sympathy you have with the people, who come to you with health problems and you solve their problems will always keep you happy and successful in your life. I will always pray for your health and long life with having your happy family.

We are back to our home and my son Ahmad Belal is always talking about you and stating that "Dr. will not take me to OT again" we say no you are OK now.

Dr. Sahab,

Ahmad Belal in general doing well and his throat looks fine; still we give him very soft food stuff; however even during eating soft things he complains about the left side of his throat and feeling pain especially during night time he wakes up 3 to 4 times and saying he has pain in his throat. I don't know but I think it might be because of wounds. At the same time once or two times he also talks about the pain on his face and ear. I hope everything is normal and because of the surgery since it is new.

I continue giving him his medicine, which was prescribed for two weeks.

Thank you so much for your kindness and God bless you and your family.

Best wishes,

Abdul Qader
